

# User Feedback on the Hyfe Cough Monitor

Insights from 25 research participants  
– July 2025 Usability Survey

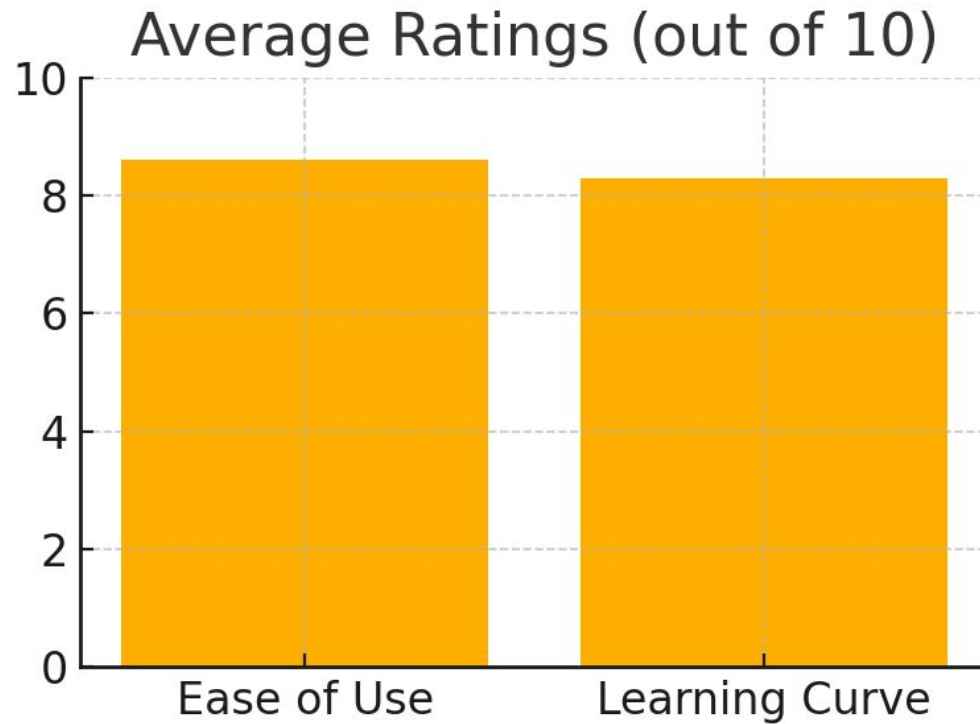

# Executive Summary

- - 96% of participants found the watch easy to use
- - 100% wore it as instructed, no serious issues
- - Usability rated 8.6/10 on average
- - Some suggestions for improvement (e.g., form factor, dashboard)

# Who We Surveyed

- - 25 research participants
- - Completed surveys after 2–3 weeks of watch use
- - Mixture of conditions (e.g., chronic cough, COPD)
- - Feedback reflects unsupervised real-world use

# Quantitative Results

# What Users Liked

- - Easy to wear
- - Long battery life
- - Minimal setup needed
  
- Quotes:
- "Don't have to think about anything — easy to wear."
- "Easy to use, quick to charge."
- "Long battery life — great for travel."

# Areas for Improvement

- - Watch felt large for smaller wrists
- - Some confusion about dashboard/data visibility
- - Feedback on limited functionality
- Quotes:
  - "Make the watch smaller — it's bulky for small wrists."
  - "I wish I could see my data more clearly."
  - "Options were limited on the monitoring"

# Insights & Implications

- - Consider hardware refinement for smaller users
- - Add tooltips or brief onboarding to dashboard
- - Explore showing personal cough trends to users
- Next Steps:
  - - Incorporate changes into Q4 design
  - - Retest improvements in next usability pilot
